Net profit	JPY5.0 billion	up 24.8% YoY
Annual cash dividend	JPY34.00	per share of common stock

**Overview of FY2019 Financial Results and Business Outlook**

“Amid the unprecedented fear and uncertainty coming from COVID-19, together with all of our employees, we continue to manage stable Internet network nationwide and provide reliable Internet connectivity and necessary network-related services to all of our clients so that they can continue their business activities. We believe our position of being able to offer comprehensive network services together with system integration (SI) should become even more critical in sustaining Japanese network society and economy,” said Koichi Suzuki, Founder, CEO and Chairman of IIIJ.

“As for FY2019 business, we executed our strategy as planned. We enhanced our full-MVNO service line-ups by launching official consumer eSIM services and adding chipSIM and SoftSIM functions, targeting many of corporates’ IoT usages. We also focused on local-5G projects, such as joint venture with SUMITOMO CORPORATION<sup>4</sup> by leveraging our existing network-systems and expertise related to full-MVNO. Security continues to be a strong revenue driver as growing demands to implement and/or upgrade security measures in addition to revenue accumulation of our conventional gateway type services for emails and web as well as SOC<sup>5</sup> services, DDoS protection services and other newer services. Cloud migration of Japanese blue chips’ internal systems has been constantly taking place and our multi-cloud service line-ups, which were expanded throughout FY2019, work to advance this shift continuously. In last May, we opened our second system module-based data center near Tokyo to integrate our server racks currently located in leased data centers and to reserve rooms to absorb future demands. Our existing service facilities have been migrated gradually. As for new businesses, JOCDN, our equity method investee with Japanese major broadcasting companies, enhanced their CDN service infrastructure in order to handle growing network traffic and invited new shareholders: NHK, sole public broadcaster in Japan, and WOWOW, prominent satellite broadcaster. DeCurret, our equity method investee engaged in FinTech business with 29 prominent Japanese large-cap shareholders, has started its cryptocurrency trading business as their 1<sup>st</sup> phase and preparing 2<sup>nd</sup> phase to handle digital currency, programmable money, security tokens and so on to exchange/deliver various value products through blockchain. They have been executing PoC projects with their shareholders,” said Eijiro Katsu, COO and

President of IJ.

“As for financial results, we achieved steady and continuous revenue growth in which security, enterprise mobile, and cloud significantly grew. Gross profit for both network services and SI also expanded with overall recurring revenue accumulation, full-MVNO profitability improvement along with its revenue accumulation, which service launch in March 2018 started with heavy fixed cost, and adequate performance of systems engineers with no unprofitable SI projects, through quality control measures. Operating profit strongly increased as SG&A stayed within our budget while we achieved gross profit expansion in both network services and SI,” continued Katsu.

“For FY2020, COVID-19 shall impose great uncertainty on global economy outlook and we may suffer from a decrease in system construction (one-time revenue) demands due to changes in Japanese companies’ investment appetite, decrease in consumer mobile acquisition due to sales partners’ shops temporary closure, and decrease in ATM transaction-related revenue due to shops temporary closure. However, we’re not too concerned about our recurring revenues, which amounted to 82.4% of FY2019 total revenues. In general, having experienced worldwide economic crisis of the past, IT and network oriented services usage shall become more and more indispensable and ultimately Internet traffic should grow. Our earnings growth pace may slowdown in FY2020, however we believe demands in the middle term will remain strong and we will pursue our continuous growth strategy going forward. Lastly, we plan to increase our FY2020 dividend forecast to JPY34.00 per common share of from JPY27.00 per common share in FY2019,” concluded Suzuki.

## FY2019 Financial Results Summary

We have adopted IFRS 16 “Leases” (hereinafter “IFRS 16”) from 1Q19. As for the details, please refer to “Changes in Accounting Policies” written in the page 17 of this document.

## FY2019 Revenues and Income

### Revenues

Total revenues were JPY202,474 million, up 6.3% YoY (JPY192,430 million for FY2018).

Network services revenue was JPY121,999 million, up 2.8% YoY (JPY118,626 million for FY2018).

Revenues for Internet connectivity services for enterprise were JPY36,635 million, up 10.4% YoY from JPY33,186 million for FY2018, mainly due to an increase in mobile-related services revenues such as MVNE and IoT type revenues by leveraging our full-MVNO infrastructure.

Revenues for Internet connectivity services for consumers were JPY26,055 million, up 3.3% YoY from JPY25,234 million for FY2018. The revenue growth was mainly due to “IIJmio Mobile Service,” consumer mobile services.

Revenues for WAN services were JPY26,972 million, down 13.0% YoY from JPY30,991 million for FY2018, mainly because of the planned migration projects of large enterprises clients who are moving away from dedicated line to mobile to connect their multiple locations.

Revenues for Outsourcing services were JPY32,337 million, up 10.7% YoY from JPY29,215 million for FY2018, mainly due to an increase in security-related services revenues.

(Notes)

- Numbers in the table above show number of contracts except for “IIJ Mobile Services (enterprise)” and “IIJmio Mobile Service” which show number of subscriptions.
- The numbers of IP service contracts includes the numbers of IIJ data center connectivity service contracts.
- Total contracted bandwidth is calculated by multiplying number of contracts under “Internet connectivity services (enterprise)” except for “IIJ Mobile Services” and the contracted bandwidths of the services respectively.
- Along with our change in accounting principle from the U.S. GAAP to IFRS from the filing of our FY2018 annual report “Yuka-shoken-houkokusho,” the reporting period of foreign consolidated subsidiaries are different. As a result, the number of our Internet connectivity service contracts and total contracted bandwidth as of March 31, 2019, described above are different from the past disclosure.

SI revenues, including equipment sales, were JPY78,394 million, up 12.5% YoY (JPY 69,652 million for FY2018). Systems construction and equipment sales revenue, a one-time revenue, was JPY31,976 million, up 14.7% YoY (JPY 27,882 million for FY2018), mainly due to continuous acquisition of system construction projects. Systems operation and maintenance revenue, a recurring revenue, was JPY46,418 million, up 11.1% YoY (JPY 41,770 million for FY2018), mainly due to continued accumulation of systems operation orders as well as an increase in private cloud services' revenues.

Orders received for SI, including equipment sales, totaled JPY83,143 million, up 11.9% YoY (JPY74,302 million for FY2018); orders received for systems construction and equipment sales were JPY31,643 million, up 9.3% YoY (JPY28,955 million for FY2018), and orders received for systems operation and maintenance were JPY51,500 million, up 13.6% YoY (JPY45,347 million for FY2018).

Order backlog for SI, equipment sales, as of March 31, 2020 amounted to JPY55,864 million, up 9.3% YoY (JPY51,115 million as of March 31, 2019); order backlog for systems construction and equipment sales was JPY7,507 million, down 4.2% YoY (JPY7,840 million as of March 31, 2019) and order backlog for systems operation and maintenance was JPY48,357 million, up 11.7% YoY (JPY43,275 million as of March 31, 2019).

ATM operation business revenues, which include commission revenue for each bank withdrawal transaction when a customer uses the ATM and monthly revenue per each installed ATMs, were JPY4,081 million, down 1.7% YoY (JPY4,152 million for FY2018), mainly due to a decrease in the number of withdrawal transactions.

### **Cost of sales**

Total cost of sales was JPY171,880 million, up 5.2% YoY (JPY163,455 million for FY2018).

Cost of network services revenue was JPY102,092 million, up 0.8% YoY (JPY101,257 million for FY2018). There was an increase in outsourcing-related costs along with our mobile-related revenue increase and a decrease in circuit-related costs along with our WAN services revenue decrease. Regarding the usage charge of mobile infrastructures provided by NTT DOCOMO, INC. ("Docomo") and other mobile carriers, mobile interconnectivity telecommunications charges per bandwidth has been decreasing every year under the rules set by the Ministry of Internal Affairs and Communications. In March 2020, we were notified by Docomo about the revised new unit price for our usages during FY2018 and FY2019 and the unit price decreased by 6.0% from the previous year. Because the unit price is revised and notified at the end of our fiscal year, we had applied our own decrease rate, 8%, based on reasonable estimate in our quarterly earnings until the third quarter of FY2019. Mainly because there was a difference between our estimate, 8% decrease, and the actual, 6.0%, we recorded additional cost of JPY0.35 billion in 4Q19.

Gross profit was JPY19,907 million, up 14.6% YoY (JPY 17,369 million for FY2018), and gross profit ratio was 16.3% (14.6% for FY2018).

Cost of SI revenues, including equipment sales was JPY67,584 million, up 12.9% YoY (JPY59,872 million for FY2018). There were an increase in network operation-related costs and an increase in purchasing costs along with increase in our systems construction revenue. Gross profit was JPY10,810 million, up 10.5% YoY (JPY9,780 million for FY2018) and gross profit ratio was 13.8% (14.0% for FY2018).

Cost of ATM operation business revenues was JPY2,204 million, down 5.3% YoY (JPY2,326 million for FY2018). Gross profit was JPY1,877 million (JPY1,825 million for FY2018) and gross profit ratio was 46.0% (44.0% for FY2018).

### **Selling, general and administrative expenses and other operating income and expenses**

Selling, general and administrative expenses, which include research and development expenses, totaled JPY24,076 million, up 6.3% YoY (JPY22,652 million for FY2018), mainly due to increases in personnel-related expenses and outsourcing expenses.

Other operating income was JPY223 million (JPY47 million for FY2018).

Other operating expenses was JPY516 million (JPY347 million for FY2018), mainly due to disposal loss on fixed assets.

### **Operating profit**

Operating profit was JPY8,225 million (JPY6,023 million for FY2018), up 36.6% YoY.

**Finance income and expenses, and share of profit (loss) of investments accounted for using equity method**

*Finance income* was JPY350 million, compared to JPY570 million for FY2018. It included gains on financial assets, such as fund, of JPY128 million (JPY399 million for FY2018) and dividend income of JPY95 million (JPY87 million for FY2018).

*Finance expense* was JPY610 million, compared to JPY432 million for FY2018. It included interest expenses of JPY583 million (JPY430 million for FY2018).

*Share of loss of investments accounted for using equity method* was JPY806 million (compared to loss of JPY318 million for FY2018), mainly due to our share of loss of investments accounted for DeCurret Inc. of JPY1,005 million.

**Profit before tax**

*Profit before tax* was JPY7,159 million (JPY5,843 million for FY2018), up 22.5% YoY.

**Profit for the year**

*Income tax expense* was JPY2,965 million (JPY2,144 million for FY2018). As a result, profit for the year was JPY4,194 million (JPY3,699 million for FY2018), up 13.4% YoY.

*Profit for the year attributable to non-controlling interests* was JPY187 million (JPY178 million for FY2018) mainly related to net income of Trust Networks Inc. As a result, profit for the year attributable to owners of parent was JPY4,007 million (JPY3,521 million for FY2018), up 13.8% YoY.

## **Considered Factors for FY2020 Financial Targets**

---

We assume the following business of ours would particularly be impacted by COVID-19: 1) ATM operation business revenue decrease due to out of operation of placed bank ATMs along with stores temporary closure, 2) Systems construction (one-time revenue) and related revenue, due to decrease in enterprises investment appetite, 3) Acquisition of consumer mobile subscribers due to large shopping malls and other stores temporary closure.

We assume impacts from these, especially ATM operation business revenue and operating profit, should particularly be apparent for the first half of FY2020 and we assume our first half operating profit to decrease YoY. On the other hand, we expect enterprise recurring revenue, such as network services, should continue to increase to some degree amid economic downturn. Please note that our FY2020 financial targets announced today are based on our expectation as of today and they include uncertainty. While we are well aware of possibility that the pandemic could further spread and/or take longer to end, we assume our FY2020 consolidated financial outlook based on our current expectation as written above.

## **Correspondence to COVID-19**

---

In order to reduce the risk of COVID-19 infection, we have been working remotely from home, except for cases where it is impossible to continuously operate social infrastructure including Internet as well as to deliver necessary corporate operation. As of the end of April 2020, our ratio of working from home was approximately 80%. In case working at office is the only option, we take measures such as working different hours (showing up early/late) and/or allocating more space for seating. We will continue to take appropriate measures in timely manners in light of the changing circumstances.

## **Dividend Policy**

---

Our basic dividend policy is that we pay dividends to our shareholders continuously and in a stable manner while considering the need to have retained earnings for the enhancement of financial position, medium-to long-term business expansion, future business investment and other goals.

Based on the Articles of Incorporation of IJ, the frequency of dividend payments is twice each fiscal year, an interim dividend and a year-end dividend. The interim dividend is decided by the meeting of the board directors of IJ and the year-end dividend is approved at IJ's general meeting of shareholders.

Based on the policy above, for FY2019, IJ had paid the interim cash dividend of JPY13.50 per share of common stock and plans the year-end dividend to be JPY13.50 per share. Total dividend per share for FY2019 will be JPY27.00 per share of common stock.

As for FY2020, while we expect 1H20 operating profit to decrease YoY, we expect full FY2020 revenue and operating profit to increase YoY mainly because network services are expected to increase. Therefore, according with our basic dividend policy of continuous payment in a stable manner, our interim dividend forecast is JPY17.00 and our year-end dividend forecast is JPY17.00, which in total is an increase of JPY7.00 per share of common stock from the previous fiscal year.

## Notes to Condensed Consolidated Financial Statements (UNAUDITED)

### Going Concern Assumption (Unaudited)

Nothing to be reported.

### Changes in Accounting Policies (Unaudited)

The Company applied the following standard starting from the first quarter of the fiscal year ended March 31, 2020.

IFRS		Outline of a new standard and amendments
IFRS 16	Leases	Amendment concerning accounting treatment for leases

The Company adopted IFRS 16 “Leases” (issued in January 2016) from the first quarter of the fiscal year ended March 31, 2020.

According to the transition approach, the Company has adopted IFRS 16 retrospectively and the cumulative effect of applying this standard was recognized as adjustment of retained earnings at the beginning date of the first quarter of the fiscal year ended March 31, 2020. In applying IFRS 16, the Company chooses the practical expedient in IFRS 16 paragraph C3 and assesses whether contracts contain leases in accordance with IAS 17 “Leases” (hereinafter, “IAS 17”) and IFRIC 4 “Determining whether an Arrangement contains a Lease.”

The Company recognized right-of-use assets and other financial liabilities related to leases previously classified as operating leases under the principles of IAS 17 were recognized at the date of initial application of IFRS 16. These liabilities are measured at present value of the remaining lease payments discounted using the lessee’s incremental borrowing rate at the date of initial application. Right-of-use assets are measured retrospectively as if IFRS 16 had been applied from the inception date. Right-of-use assets are depreciated using the straight-line method.

For leases that were previously classified as finance leases as a lessee under the principles of IAS 17, the carrying amount of right-of-use assets and other financial liabilities as of the date of initial application has been measured based on the carrying amount of right-of-use assets and other financial liabilities, respectively, under IAS 17 as of the day immediately before that date.

The following is the reconciliation of non-cancellable operating lease contracts disclosed applying IAS 17 as of March 31, 2019 and other financial liabilities related to leases recognized in the consolidated statement of financial position at the date of initial application.

	(Thousands of yen)
Non- Cancellable operating lease contracts disclosed as of March 31, 2019	11,305,119
Operating lease contracts discounted using the incremental borrowing rate as of April 1, 2019	11,292,343
Finance lease contracts disclosed as of March 31, 2019	18,033,862
Cancellable operating lease contracts, etc.	27,745,102
Other financial liabilities related to leases as of April 1, 2019	57,071,307

As a result of the adoption of IFRS 16, the Company recorded right-of-use assets of JPY38,988,207 thousand and other financial liabilities of JPY39,037,445 thousand at April 1, 2019. In addition, retained earnings decreased by JPY33,728 thousand primarily due to having adopted the method where the cumulative effect of applying this standard is recognized at the date of initial application.

The following practical expedients are used in the adoption of IFRS 16.

- A single discount rate is applied to portfolios of leases with reasonably similar characteristics.
- Leases for which the lease term ends within 12 months of the date of initial application are accounted for in the same way as short-term leases.
- Initial direct costs are excluded from the measurement of the right-of-use asset at the date of initial application.
- The Company uses hindsight to calculate the lease term for lease contracts including options to extend or terminate the lease.

The balances of other financial liabilities related to leases are as follows:

Classification under IAS 17	As of March 31, 2019	As of March 31, 2020
	Thousands of yen	Thousands of yen
Finance leases	18,033,862	18,062,638
Operating leases	—	34,591,850

### **Segment Information (Unaudited)**

IIJ and its subsidiaries (collectively “the Company”) primarily operates its network service and system integration business, which provides a comprehensive range of network solutions to meet its customers’ needs by cross-selling a variety of services, including Internet connectivity services, WAN services, outsourcing services, systems integration and sales of network-related equipment, and the ATM operation business. Therefore, the Company defined two reportable segments: “Network service and systems integration business” and “ATM operation business.”
