• Matters regarding the IIJ's stock acquisition rights

	Allotment date	Number of stock acquisition rights outstanding	Type of stock and number of shares subject to stock acquisition rights	Issue price (per stock acquisition right)	Exercise price of stock acquisition rights	Exercise period
#1 Stock Acquisition Rights	July 14, 2011	60	Common Stock 48,000 shares	JPY259,344	JPY1	From July 15, 2011 to July 14, 2041
#2 Stock Acquisition Rights	July 13, 2012	65	Common Stock 52,000 shares	JPY318,562	JPY1	From July 14, 2012 to July 13, 2042
#3 Stock Acquisition Rights	July 11, 2013	36	Common Stock 28,800 shares	JPY647,000	JPY1	From July 12, 2013 to July 11, 2043
#4 Stock Acquisition Rights	July 10, 2014	51	Common Stock 40,800 shares	JPY422,600	JPY1	From July 11, 2014 to July 10, 2044
#5 Stock Acquisition Rights	July 13, 2015	71	Common Stock 56,800 shares	JPY369,200	JPY1	From July 14, 2015 to July 13, 2045
#6 Stock Acquisition Rights	July 11, 2016	78	Common Stock 62,400 shares	JPY360,000	JPY1	From July 12, 2016 to July 11, 2046
#7 Stock Acquisition Rights	July 14, 2017	85	Common Stock 68,000 shares	JPY337,200	JPY1	From July 15, 2017 to July 14, 2047
#8 Stock Acquisition Rights	July 13, 2018	87	Common Stock 69,600 shares	JPY347,600	JPY1	From July 14, 2018 to July 13, 2048
#9 Stock Acquisition Rights	July 12, 2019	96	Common Stock 76,800 shares	JPY354,600	JPY1	From July 13, 2019 to July 12, 2049
#10 Stock Acquisition Rights	July 10, 2020	65	Common Stock 52,000 shares	JPY643,400	JPY1	From July 11, 2020 to July 10, 2050
#11 Stock Acquisition Rights	July 15, 2021	52	Common Stock 41,600 shares	JPY1,258,400	JPY1	From July 16, 2021 to July 15, 2051
#12 Stock Acquisition Rights	July 14, 2022	12,962	Common Stock 25,924 shares	JPY4,361	JPY1	From July 15, 2022 to July 14, 2052
#13 Stock Acquisition Rights	July 13, 2023	13,686	Common Stock 27,372 shares	JPY4,362	JPY1	From July 14, 2023 to July 13, 2053

(Notes)

1. A person granted the stock acquisition rights may exercise his or her rights only within ten days from the day immediately following the day on which the person loses his or her position as neither a director nor an executive officer of IIJ.
2. IIJ conducted a 1:200 stock split on common stock with an effective date of October 1, 2012. In addition, IIJ conducted 1:2 stock splits on common stock with respective effective dates of January 1, 2021 and October 1, 2022. In connection with these stock splits, as for the above mentioned stock acquisition rights, number of shares to be issued per stock acquisition right upon exercise of each stock acquisition right were adjusted as follows after the later record date.
 - #1 and #2:
 - Before adjustment: 1 share per stock acquisition right
 - After adjustment: 800 shares per stock acquisition right
 - From #3 to #10:
 - Before adjustment: 200 shares per stock acquisition right
 - After adjustment: 800 shares per stock acquisition right
 - #11
 - Before adjustment: 400 shares per stock acquisition right
 - After adjustment: 800 shares per stock acquisition right
 - #12 and #13
 - Before adjustment: 1 shares per stock acquisition right
 - After adjustment: 2 shares per stock acquisition right

(1) IJJ's stock acquisition rights granted to and held by directors as of the End of FY2025

	Number of stock acquisition rights	Type of stock and number of shares subject to stock acquisition rights	Number of holders and number of stock acquisition rights
#1 Stock Acquisition Rights	54	Common Stock 43,200 shares	3 Directors 54
#2 Stock Acquisition Rights	45	Common Stock 36,000 shares	3 Directors 45
#3 Stock Acquisition Rights	24	Common Stock 19,200 shares	3 Directors 24
#4 Stock Acquisition Rights	35	Common Stock 28,000 shares	3 Directors 35
#5 Stock Acquisition Rights	41	Common Stock 32,800 shares	3 Directors 41
#6 Stock Acquisition Rights	43	Common Stock 34,400 shares	3 Directors 43
#7 Stock Acquisition Rights	48	Common Stock 38,400 shares	3 Directors 48
#8 Stock Acquisition Rights	47	Common Stock 37,600 shares	3 Directors 47
#9 Stock Acquisition Rights	46	Common Stock 36,800 shares	3 Directors 46
#10 Stock Acquisition Rights	32	Common Stock 25,600 shares	4 Directors 32
#11 Stock Acquisition Rights	23	Common Stock 18,400 shares	5 Directors 23
#12 Stock Acquisition Rights	6,943	Common Stock 13,886 shares	6 Directors 6,943
#13 Stock Acquisition Rights	6,973	Common Stock 13,946 shares	6 Directors 6,973

(Notes)

- In place of the retirement allowance plan for directors which was abolished, the stock acquisition rights mentioned in the above were issued in consideration of their execution of duties.
- There are no stock acquisition rights granted to and held by IJJ's part-time directors, outside directors or company auditors at the end of FY2023.
- IJJ conducted a 1:200 stock split on common stock with an effective date of October 1, 2012. In addition, IJJ conducted 1:2 stock splits on common stock with respective effective dates of January 1, 2021 and October 1, 2022. In connection with these stock splits, as for the above mentioned stock acquisition rights, number of shares to be issued per stock acquisition right upon exercise of each stock acquisition right were adjusted as follows after the later record date.
 - #1 and #2:
 - Before adjustment: 1 share per stock acquisition right
 - After adjustment: 800 shares per stock acquisition right
 - From #3 to #10:
 - Before adjustment: 200 shares per stock acquisition right
 - After adjustment: 800 shares per stock acquisition right
 - #11
 - Before adjustment: 400 shares per stock acquisition right
 - After adjustment: 800 shares per stock acquisition right
 - #12 and #13
 - Before adjustment: 1 shares per stock acquisition right
 - After adjustment: 2 shares per stock acquisition right

(2) IJJ's stock acquisition rights granted to employees or others during FY2025

There is nothing to report on this subject.

• Basic Systems and Policies of IJJ

(1) Systems for securing the appropriateness of business

The details of the resolution by the Board of Directors of IJJ are as follows:

1. Systems for ensuring the compliance of Directors and employees with the law and articles of incorporation in the execution of their duties
 - (1) IJJ will establish a code of ethics that sets for a standard of conduct and requires strict adherence to the law. In addition, IJJ will establish regulations for applying the laws regarding the prevention of insider trading, the protection of personal information, among others. IJJ will disseminate those regulations to officers and employees, and conduct periodic education.
 - (2) IJJ will establish a system for appointing the necessary personnel to ensure compliance with the law, and for consulting with lawyers and other experts outside IJJ.
 - (3) IJJ will establish an internal reporting system for reporting any legal violations, and will maintain a whistleblower system with a contact point in accordance with legal requirements to ensure the protection of whistleblowers.
 - (4) Internal Auditing Office under the direct control of the President will conduct internal audits on a regular basis, indicating where each division could improve compliance with the law, and overseeing the improvements.
 - (5) For legally required reports, ad hoc reports, and other types of releases, IJJ will establish a Disclosure Committee whose members consist of Directors, Outside Directors, Executive Officers and Auditors, whom will evaluate the content for appropriateness and completeness, and approve any material to be released.
2. Systems for preserving and managing information related to the execution of duties by Directors
 - (1) Basic policy and procedures regarding the handling of information assets will be set and followed in the handling of information and documents related to the execution of duties by Directors (“performance information”), these policies and procedures will detail who is responsible for managing the information, how long the information is to be stored, how it is to be stored, measures for countering loss or leakage of the information, and proper management of the information. The management of this information will be reviewed on a regular basis.
 - (2) IJJ will create a system that ensures the proper filing of performance information (committing it to electronic storage when necessary), and that enables the quick verification of the existence, condition, and content of these documents. In addition, the system will allow people with the proper authority to view documents related to the Company Auditors and others without delay.
 - (3) The duties related to the above fall under the jurisdiction of a director or an executive officer in charge of information security and a director or an executive officer in charge of document management of IJJ.
3. Regulations governing risk management and other systems
 - (1) The Director (or executive officer) that oversees the operation of each division will identify the risks defined by the governing regulations, evaluate these risks, and develop measures to counter these risks, as well as review them on a regular basis.
 - (2) For certain risk categories, an Evaluation Committee will be established to evaluate the risk and to develop countermeasures.
 - (3) A Business Continuity Plan will be developed to address potential emergency situations.
 - (4) An Internal Auditor Office under the direct control of the President will conduct internal audits on a regular basis, indicating where each division could improve operations, including risk management, and overseeing the improvements.
4. Systems for ensuring the efficient execution of duties by Directors
 - (1) A business plan for each fiscal year will be formulated in line with management objectives, and each business organization will actively seek to achieve the goals put forth in the plan. In addition, regular progress reports will be submitted and reviewed to monitor progress on each target.
 - (2) As for management, all issues that should be decided by the Board of Directors in accordance with the Regulations of the Board of Directors will be strictly decided by the Board, and as a basic rule of the decision-making process, sufficient documentation on the issue to be decided will be distributed to all Board members in advance.
 - (3) In the execution of daily duties, authority will be delegated based on the scope of authority regulations and division of duties regulations, and managers at each level will execute their duties while complying with the rules of the decision making process.
 - (4) To reinforce the Board of Directors’ authority, a certain number of people with notable management acumen will be appointed as Outside Directors.
5. Systems for ensuring the proper operation of corporate groups consisting of IJJ and its Subsidiaries (collectively “the Company”)
 - (1) Subsidiaries will be managed based on the subsidiary management regulations, which are the basic policy of subsidiary management, and an agreement will be made with the parent company regarding the management of the subsidiary.
 - (2) Subsidiaries will report on required items, and a system for consultation will be established.
 - (3) To impose internal control on important items, regulations governing the entire corporate group will be established, and subsidiaries will be required to comply with them.
 - (4) IJJ’s Internal Audit Office will perform internal audits of subsidiaries.
6. Providing employee to assist Company Auditors, securing those employees’ independence from directors and effectiveness of company auditors’ instruction to those employees
 - (1) IJJ establishes Internal Auditing Office under direct control of President and assigns to the Office as the full-time basis. These employees work closely with the Company Auditors to reflect their opinions on IJJ’s internal audit plan.
 - (2) The selection, appointment, and transfer of employee assigned to the Internal Auditing Office should be conducted with full consideration of the opinions from the Board of Company Auditors.
 - (3) Other than above, it will be consulted and decided with the Board of Company Auditors as for assignment of employees who assist the Company Auditors and arrangement to ensure effectiveness of the Company Auditors’ instruction to these employees.

7. Systems that directors and employees of IJ and its subsidiaries make a report to the Company Auditors, and systems preventing the person who makes report to the Company Auditor from being disadvantageously treated due to such report
 - (1) In accordance with the provisions of the Board of Company Auditors, Directors and employees will report and provide information upon or periodically the Company Auditor's request.
 - (2) Company Auditors will be a member of panel such as Disclosure Committee that makes the important decision-making.
 - (3) If the whistleblowing relates to directors, the investigation shall be conducted under the direction of the Board of Company Auditors. Whistleblower will be safely protected and kept secret, and it is prohibited that IJ disadvantageously treats that person whether the whistleblowing is anonymous or not.
8. Policies on prepaid expenses for the execution of the duties of the Company Auditors, on expenses for procedures for repayment and execution of other relevant duties, or on debt processing

IJ will establish budget for the Board of Company Auditors for the execution of their duties every year, and will listen to Company Auditors' opinion.
9. Other systems for ensuring effective Company Auditors' audits
 - (1) In order to ensure that the Board of Company Auditors can properly execute their duties, the necessary external experts will be retained.
 - (2) To preserve the independence of the Accounting Auditors, IJ and its subsidiaries are not allowed to receive the accounting auditors' services which could possibly harm their independence (including the person related the Accounting Auditors) as well as takes appropriate measures to obtain consent to the accounting auditors remuneration and others by the Board of Company Auditors in an appropriate manner.
 - (3) IJ makes an effort to appoint a financial expert and legal expert for Company Auditors.

(2) Status of systems for ensuring the appropriateness of business activities

Business activities by directors and employees of IJ and its subsidiaries are governed by the Code of Ethics, the Basic Rules for Internal Control and etc. which regulate the entire corporate groups. The Board of Directors of IJ consists of 11 directors, including 5 outside directors and daily oversight and supervision on the business execution are carried by means of ordinary (monthly) and extraordinary meetings of the Board of Directors, management meetings and etc. Subsidiaries are properly managed through necessity reports and discussion based on the subsidiary management regulations, which are the basic policy of subsidiary management. Other than above, IJ operates the Whistleblower system for the entire corporate groups.

As for risk management, such as information security and business continuity risks, evaluation committees are established to evaluate those risks and to develop countermeasures for certain risk categories.

The Board of Company Auditors consists of 4 company auditors, including 2 outside company auditors. Oversight on business execution are carried by means of daily business audits by Full-time Company Auditor, ordinary (monthly) and extraordinary meetings of the Board of Company Auditors and etc. Furthermore, the Board of Company Auditors is in charge of overseeing conflict-of-interest transactions with accounting auditors, decision of reappointment or dismissal of the Accounting Auditor and etc. We have placed an Internal Auditing Office which consists of 6 members including a manager. They plan and perform audits to IJ and its subsidiaries based on internal audit plan. Results for the audit are periodically reported to the Board of Company Auditors and close cooperation is made with the Company Auditors.

Other than above, in order to maintain adequate disclosure, IJ has established the Disclosure Committee which consists of directors, executive officers and company auditors based on the Code of Information Disclosure and verifies appropriate and sufficient disclosure.

(3) Basic Policy on Control of IJ.

There is nothing to report on this subject.

• Notes to Consolidated Financial Statements

1. Notes to Basic Significant Matters Regarding Presentation of Consolidated Financial Statements

1-1. Matters regarding scope of consolidation

Number of consolidated subsidiaries and names of consolidated subsidiaries

Number of consolidated subsidiaries: 18

Names of major consolidated subsidiaries: IJ Engineering Inc. ("IJ-EG"), IJ Global Solutions Inc., Trust Networks Inc. ("Trust Networks"), Net Chart Japan, Inc., IJ Protech Inc., IJ America Inc., IJ Europe Limited, IJ Global Solutions Singapore Pte. Ltd., PTC SYSTEM (S) PTE LTD ("PTC") and IJ Global Solutions China Inc.

Changes in the scope of consolidation: Sensiphia, Inc. is included in the scope of consolidation due to the purchase of its shares for the year ended March 31, 2026.

1-2. Matters regarding applying equity method

Number and names of equity method investees

Number of equity method investees: 7

Names of major equity method investees: INTERNET MULTIFEED CO., DeCurret Holdings, Inc. and Trinity Inc.

Changes in the scope of applying equity method: Geostationary Meteorological Satellite Systems Services is included in the scope of applying equity method due to the purchase of its shares for the year ended March 31, 2026.

1-3. Significant accounting policies

(1) Basis of presentation

The consolidated financial statements are prepared in accordance with IFRS pursuant to the provisions of Article 120-1 of Company Accounting Regulations. However, certain disclosures required under IFRS are omitted pursuant to the provisions of the second sentence of Article 120-1.

(2) Valuation method and policy of assets

1) Financial assets

Financial assets held are categorized as (a) financial assets measured at amortized cost, (b) debt-based financial assets measured at fair value through other comprehensive income ("FVTOCI"), (c) equity-based financial assets measured at FVTOCI or (d) financial assets measured at fair value through profit or loss ("FVTPL").

(a) Financial assets measured at amortized cost

Financial assets are measured at amortized cost if both of the following conditions are met:

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

After initial recognition, financial assets measured at amortized cost are accounted for using the effective interest method deducting impairment losses. Amortization under the effective interest method and gain or loss in derecognition are included in profit or loss during the period.

(b) Debt-based financial assets measured at FVTOCI

Financial assets are measured at FVTOCI if both of the following conditions are met:

- the asset is held in a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

After initial recognition, debt-based financial assets measured at FVTOCI are measured at fair value and changes in fair value are recognized as other comprehensive income. Gain or loss on disposal of investments, foreign exchange gain or loss, and impairment losses are recognized in profit or loss during the period.

(c) Equity-based financial assets measured at FVTOCI

There are some equity-based financial assets for which the Company irrevocably elected at initial recognition that subsequent changes in fair value of the assets are included in other comprehensive income. These assets are recognized as equity-based financial assets measured at FVTOCI. The Company makes an irrevocable election on each investment.

After initial recognition, equity-based financial assets measured at FVTOCI are measured at fair value and changes in fair value are recognized as other comprehensive income. When the Company disposes of investments, cumulative gain or loss recognized through other comprehensive income are transferred from other components of equity to retained earnings.

Dividend income from equity-based financial assets measured at FVTOCI is recognized as profit in finance income, unless it is clear that it is a refund on investment.

(d) Financial assets measured at FVTPL

Financial assets other than the abovementioned financial assets measured at amortized cost, debt-based financial assets measured at FVTOCI and equity-based financial assets measured at FVTOCI are categorized to financial assets measured at FVTPL. There are no financial assets for which the Company has irrevocably elected that the assets be accounted for at FVTPL on initial recognition.

After initial recognition, equity-based financial assets measured at FVTPL are measured at fair value and changes in fair value are recognized as profit or loss. Gain or loss related to financial assets measured at FVTPL is recognized as profit or loss.

(e) Impairment loss on financial assets

For impairment loss on financial assets measured at amortized cost, the Company recognizes allowance for credit losses based on the expected credit losses on the financial assets.

The Company evaluates whether the credit risks of financial instruments have increased significantly since initial recognition on each annual closing date. For financial instruments that have not had a significant increase in credit risk since initial recognition, allowance for credit losses on the instrument is measured at the amount equal to that of the 12-month expected credit losses. If the credit risk of financial instruments has significantly increased since initial recognition, allowance for credit losses on the instruments are measured at amount equal to the lifetime expected credit losses.

When contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly. In evaluating whether credit risk has increased significantly or not, the Company considers reasonable and supportable information, in addition to past-due information. When financial assets have low risk at the reporting date, the Company assumes that there has not been a significant increase in credit risk since initial recognition.

However, in evaluating financial assets that do not have a significant financing component such as a trade receivables, allowance for credit losses is measured at an amount equal to the lifetime expected credit losses, regardless of whether credit risk has increased significantly since initial recognition.

Expected credit losses on financial assets are estimated by reflecting the following factors:

- An unbiased and probability-weighted amount determined by evaluating a range of possible outcomes
- Time value of money
- Reasonable and supportable information about past events, current conditions and reasonable and supportable forecasts of future economic conditions at the reporting date

The provision and reversal of allowance for credit losses on financial assets are included in profit or loss.

2) Inventories

The Company's inventories mainly consist of network equipment and mobile devices held for resale and work in progress related to systems construction. Inventories are measured at the lower of historical cost or net realizable value. Amounts for network equipment and mobile devices held for sale are calculated using the moving average method and amounts for work in progress related to systems integration are measured at actual manufacturing cost including indirect manufacturing costs. Net realizable value is calculated at the estimated selling price during the normal course of business less the estimated costs to completion and estimated expenses to make a sale.

(3) Depreciation and amortization of property and equipment

1) Tangible assets

Tangible assets are measured at acquisition cost less accumulated depreciation and accumulated impairment losses. Acquisition costs include costs directly attributable to acquisition of the assets and dismantling and removing costs. Depreciation of tangible assets excluding land and construction in progress, is calculated using straight-line method over the estimated useful lives. Estimated useful lives by major asset class are as follows:

Buildings and Construction other than buildings	4 to 50 Years
Machinery, tools, furniture and fixtures	2 to 20 Years

2) Goodwill

The Company recognizes goodwill at the amount of fair value, including recognized noncontrolling interests on the acquiree, measured at the acquisition date, less the net recognized amount of assets acquired and liabilities assumed that are recognizable at the date of acquisition, which is normally fair value.

Goodwill is included in our consolidated statements of financial position at the carrying amount which is the acquisition costs less the accumulated impairment losses.

3) Intangible assets

Intangible assets acquired separately are measured at acquisition cost at initial recognition. Intangible assets with finite useful lives consist of software, customer relationships, trademark rights and patent rights. Software, trademark rights and patent rights are amortized using straight-line method over the estimated useful lives, customer relationships are amortized using the sum-of-the-years-digits method or straight-line method over the estimated useful lives.

Estimated useful lives of major intangible assets are as follows:

Software	5 to 7 Years
Customer relationships	9 to 19 Years
Trademark rights and patent rights	8 to 10 Years

Intangible assets deemed to have indefinite useful lives are not amortized and are recorded at their carrying amount, which is the acquisition cost less accumulated impairment losses.

(4) Leases

In accordance with IFRS 16, the Company has determined whether a contract is, or contains a lease, at the inception of the contract. A contract is determined to be a lease or contain a lease, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for a consideration.

When a contract is determined to be a lease or contain a lease, the Company initially recognizes a right-of-use asset and a lease liability at the commencement date of the contract.

Lease liabilities are initially measured at the present value of lease payments not paid at the commencement date, discounted by calculated interest rate of the lease or, if the calculated interest rate cannot be determined easily, the Company's incremental borrowing rate. In general, the Company uses the incremental borrowing rate as a discount rate. Lease liabilities are subsequently measured by increasing the carrying amount to reflect the interest on the lease liability and reducing the carrying amount to reflect the lease payments. In our consolidated statement of financial position, lease liabilities are included in other financial liabilities. In measuring the lease liability, lease fee in each contract is allocated to the lease components and non-lease components based on the ratio of their independent prices. However, for data centers where the Company is a lessee, lease components and non-lease components related to them are not separated and are recognized as a single lease component. When the condition of the leases are changed, the Company remeasures the lease liability.

The right-of-use asset is initially measured at cost, which comprises the initial measurement of lease liability, any initial direct cost incurred and prepaid lease payments. A cost model is used for subsequent measurement after initial recognition. Right-of-use assets are depreciated using the straight-line method. The depreciation period is the estimated useful life of the underlying asset if ownership of the underlying asset is transferred to the lessee by the end of the lease term or if the exercise of the purchase option by the lessee is reasonably certain. Otherwise, the depreciation period is the shorter of the useful life of the right-of-use asset or the lease term. The Company does not recognize right-of-use assets and lease liabilities for leases with a lease term of 12 months or less or when the underlying assets are of low value, and recognizes lease payments as an expense on a straight-line basis over the lease term.

(5) Impairment of non-financial assets

The Company reviews carrying amounts of non-financial assets, except for inventories and deferred tax assets, on each reporting date to assess whether impairment indicators exist. If such indicators exist, the Company then estimates the recoverable amount of the asset. For goodwill and intangible assets deemed to have indefinite useful lives, the Company performs impairment tests on each annual closing date and whenever there is an indication that an asset may be impaired.

Cash-generating units are groups that represent the minimum of assets for which continuous use generates cash inflows that are largely independent from other assets or groups of assets. Goodwill arising from business combinations is allocated to cash-generating units or groups of cash-generating units which are expected to benefit from synergies resulting from the business combination.

The recoverable amount of an asset or a cash-generating unit is calculated at the higher of the value in use or the fair value less costs of disposal. Value in use is calculated at the present value of estimated future cash flows, which are discounted using a pre-tax weighted average cost of capital of each cash-generating unit.

If the carrying amount of an asset or a cash-generating unit exceeds its recoverable amount, the Company recognizes an impairment loss in profit or loss. Recognized impairment loss is allocated first to goodwill in the cash-generating unit to be deducted from its carrying amount, and then carrying amounts of other

assets in the cash-generating unit are deducted on a pro rata basis.

The Company reverses impairment losses when there is any indication of reversal of the impairment loss recognized in past years and the estimated recoverable amount exceeds the carrying amount. The amount of reversal is limited to the carrying amount if no impairment loss had been recognized and depreciation or amortization had been continued. Impairment losses recognized for goodwill are not reversed.

(6) Recognition of significant provisions

The Company recognizes a provision only when a present obligation (legal or constructive) has arisen as the result of a past event, payment is probable, settlement is expected to result in an outflow of resources, and the amount of obligation can be estimated reliably.

Provisions are measured at the best estimate (including risks and uncertainties) of the expenditure required to settle the present obligation as of the annual closing date, and reflect the present value of expenditures required to settle the obligation where the time value of money is material.

(7) Revenue recognition

The Company recognizes revenue based on the following five-step model.

Step 1: Identify the contract with a customer

Step 2: Identify all the individual performance obligations within the contract

Step 3: Determine the transaction price

Step 4: Allocate the price to the performance obligations

Step 5: Recognize revenue as the performance obligations are fulfilled

We have determined that our performance obligations related to network service are normally satisfied over time because network services make various networks accessible during the contract period. Therefore, revenues from network service are recognized monthly on a straight-line basis over the contract period.

System integration revenues consist of the system construction service and the system operating and maintenance service.

Our performance obligations related to system construction service are satisfied over time, because our performance does not create an asset with an alternative use to us and we have an enforceable right to payment for performance completed to date. Therefore, revenues from system construction service are recognized based on the progress of the fulfillment of the performance obligations measured at the end of the reporting period. The progress is measured by the input method based on the incurred cost (cost to cost method) to reflect the progress of the construction properly because we understand that cost is incurred as progress of system construction.

Revenues from system operating and maintenance service are recognized on a straight-line basis over the period when the performance obligations are fulfilled because our performance obligations maintain various systems available to use during the contract period.

ATM commissions are collected when the customers use the ATM services. The revenues are recognized when they are collected because the customers obtain the benefit at the time of use.

(8) Income tax

Income tax expenses are comprised of current and deferred taxes and recognized in profit or loss, except for those arising from other comprehensive income, those recognized directly in equity or those arising from business combinations.

Current taxes are measured at the amount expected to be paid to or recovered from the tax authority. Tax rates and tax laws applied to calculation of tax amounts are enacted or substantively enacted by the annual closing date.

Deferred taxes are recognized for temporary differences between carrying amounts of assets and liabilities as of the reporting date based on tax laws and carrying amounts under IFRS and amounts based on tax accounting, tax loss carryforwards and tax credit carryforwards.

Deferred tax assets and liabilities are not recognized for the following temporary differences:

- Temporary differences arising from the initial recognition of assets and liabilities from transactions, except for business combinations, that do not affect either accounting profit or taxable income (loss).
- Deductible temporary differences related to investments in subsidiaries and associates, and interests in joint arrangements, for which it is probable that the reversal will not occur in the foreseeable future or that taxable profit will not be available against which the temporary difference will be utilized.
- Taxable temporary differences related to investments in subsidiaries and associates, and interests in joint arrangements, for which the Company is able to control the timing of the reversal of the differences and it is probable that the reversal will not occur in the foreseeable future.

Deferred tax liabilities are, in principle, recognized for all taxable temporary differences, and deferred tax assets are for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the temporary difference will be utilized.

Carrying amounts of deferred tax assets are reviewed at the end of each reporting period, and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilized. Any such reduction is subsequently reversed to the extent that it becomes probable that sufficient taxable profit will be available.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and laws that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset only if the Company has the legal right to settle current tax amounts on a net basis and the deferred tax amounts are levied by the same tax authority on the same entity or different entities that intend to realize the asset and settle the liability at the same time.

The company has applied the exception provided in Amendments to IAS 12, and it does not recognize and does not disclose information about deferred tax assets and liabilities related to income taxes arising from tax law enacted or substantively enacted to implement the Pillar Two model rules published by the Organization for Economic Co-operation and Development.

(9) Other significant accounting policies

1) Retirement and pension plans

Remeasurement of net defined benefit plan liabilities (assets) are recognized as other comprehensive income as incurred and immediately transferred from other components of equity to retained earnings.

Past service costs are recognized as a profit or loss in the period in which they are incurred.

2) Application of Japanese Group Tax Sharing System

The Company applied the Group Tax Sharing System.

3) Presentation of the amount

The figures are rounded to the nearest million yen.

2. Notes to Accounting estimates and judgements

(Impairment test for goodwill and intangible asset with an indefinite useful life)

Measurement of recoverable amount requires us to make various judgements and assumptions including the future cash flows, the discount rate and the growth rate. These assumptions may be impacted significantly by future changes in uncertain economic conditions, which could result in a recognition of impairment loss on our consolidated financial statements in the future.

The amount of goodwill and intangible asset with an indefinite useful life as of March 31, 2026 were JPY 10,773 million and JPY 1,222 million, respectively.

(Measurement of defined benefit obligations)

The present value of defined benefit obligations are calculated based on actuarial assumptions. These actuarial assumptions require estimates and judgments on variables, such as discount rates. A certain subsidiary obtain advice from external pension actuaries with respect to the appropriateness of these actuarial assumptions including these variables. There is the possibility that these assumptions may be affected by changes in uncertain future economic conditions, or by the publication or the amendment of related laws, which may have a material impact on the consolidated financial statements in future periods.

The amount of defined benefit obligations as of March 31, 2026 was JPY 1,559 million.

(Measurement of the progress towards complete satisfaction of the performance obligation of the system construction service)

We have determined the performance obligations of the system construction service are satisfied over time and the appropriate method of measuring progress towards complete satisfaction is input method, i.e. costs incurred relative to the total expected costs to the satisfaction of those performance obligations (cost to cost method). For applying the cost to cost method, the calculation of the total expected cost to the satisfaction of the performance obligations requires us to make various judgement and assumptions. There is the possibility that these assumptions may be affected by changes in uncertain future conditions regarding to the system construction service, such as the increasing production costs incurred to additional requirements from the customer, which may have a material impact on the consolidated financial statements in future periods.

For the year ended March 31, 2026, the amount of revenue from system construction service recognized by the cost to cost method was JPY 56,107 million.

3. Notes to Consolidated Balance Sheet

(1) Amount equivalent to accumulated depreciation and amortization of property and equipment:	JPY	29,342 million
(2) Allowance for doubtful accounts directly deducted from the assets		
Current assets		
Trade receivables	JPY	143 million
Other financial assets	JPY	1 million
Non-current assets		
Other financial assets	JPY	26 million

4. Notes to Consolidated Statements of Shareholders' Equity

(1) Number of shares issued and outstanding, as of March 31, 2026

(Unit: shares)

Class of stock	Balance at the beginning of current period	Increase	Decrease	Balance at the ending of current period
Common stock	183,184,884	263,968	-	183,448,852

(Outline of the cause of changes) The increase was due to the exercise of stock acquisition rights.

(2) Dividends from surplus

(i) Amount of dividends paid

Resolution	Classes of stock	Total amount of dividends	Dividends per share	Record date	Effective date
Ordinary General Meeting of Shareholders held on June 26, 2025	Common stock	JPY 3,096 million	JPY17.50	March 31, 2025	June 27, 2025
Board of Directors' meeting held on November 7, 2025	Common stock	JPY3,457 million	JPY19.50	September 30, 2025	December 5, 2025

(ii) Dividends declared during the year ended March 31, 2026 and to be paid during the next fiscal year

Resolution	Classes of stock	Source of dividends	Total amount of dividends	Dividends per share	Record date	Effective Date
Ordinary General Meeting of Shareholders to be held on June 26, 2026	Common stock	Retained Earnings	JPY3,457 million	JPY19.50	March 31, 2026	June 29, 2026

(3) Class and number of common stock to be acquired by exercising stock acquisition rights outstanding as of March 31, 2026

	#1 Stock acquisition rights issued on July 14, 2011	#2 Stock acquisition rights issued on July 13, 2012	#3 Stock acquisition rights issued on July 11, 2013
Class and number of common stock to be acquired	Common stock 48,000 shares	Common stock 52,000 shares	Common stock 28,800 shares
	#4 Stock acquisition rights issued on July 10, 2014	#5 Stock acquisition rights issued on July 13, 2015	#6 Stock acquisition rights issued on July 11, 2016
Class and number of common stock to be acquired	Common stock 40,800 shares	Common stock 56,800 shares	Common stock 62,400 shares
	#7 Stock acquisition rights issued on July 14, 2017	#8 Stock acquisition rights issued on July 13, 2018	#9 Stock acquisition rights issued on July 12, 2019
Class and number of common stock to be acquired	Common stock 68,000 shares	Common stock 69,600 shares	Common stock 76,800 shares
	#10 Stock acquisition rights issued on July 10, 2020	#11 Stock acquisition rights issued on July 15, 2021	#12 Stock acquisition rights issued on July 14, 2022
Class and number of common stock to be acquired	Common stock 52,000 shares	Common stock 41,600 shares	Common stock 25,924 shares
	#13 Stock acquisition rights issued on July 13, 2023		
Class and number of common stock to be acquired	Common stock 27,372 shares		

(4) Other components of equity

Other components of equity includes translation adjustments resulting from the translation of financial statements of foreign subsidiaries, unrealized gains or losses on available-for-sale securities, gains or losses on cash flow hedging derivative instruments and pension liability adjustments.

5. Notes to Financial Instruments

(1) Conditions of financial instruments

(i) The Company's policy for financial instruments

We primarily lease our network equipment under capital lease arrangements. Our fund management strategy is that we invest in highly safe and short-term financial instrument within our cash on hand.

(ii) Nature and risks of financial instruments

- Account receivables are exposed to credit risks of customers.
- Financial assets measured at fair value are exposed to market volatility risks.
- Accounts payable are mostly due within one year.
- Trade receivables and payables denominated in foreign currencies are exposed to currency risks.

(iii) Risk management for financial instruments

- The Company controls credit risk in accordance with its credit risk guidelines.
- The Company reviews the fair value of financial assets measured at fair value on a regular basis.
- The Company controls liquidity risk by adequately forecasting and managing liquidity needs.
- The Company continually monitors currency markets to manage currency risks.

(2) Fair value of financial instruments

Book value, fair value and the differences between them as of March 31, 2026 are as follows. Financial instruments with fair values that are extremely difficult to evaluate their fair value are not included in the table below:

(Unit: JPY millions)

	Amount Recognized in Consolidated Statements of Financial Position	Fair Value
Assets		
Other investments		
Financial assets measured at amortized cost		
Debt securities	2,000	1,732

(Note) Fair value is calculated by discounting to net present value the total amount of principal and interest using expected interest rates when newly undertaking the same transaction.

(3) Fair value of financial instruments

1) Classification of fair value hierarchy by level

IFRS regulates the three levels of fair value hierarchy and inputs used for the fair value measurement are prioritized according to the observable availability. The contents of each input are as follows:

Level 1: quoted prices in active markets

Level 2: inputs other than quoted prices included in Level 1 that are observable either directly or indirectly

Level 3: unobservable inputs

2) Financial instruments measured at fair value

The following table presents the Company's assets that are measured at fair value consistent with the fair value hierarchy.

Equity securities

Fair values of marketable financial instruments are evaluated at quoted market prices and these instruments are classified as Level 1. If market prices do not exist, the Company evaluates fair value by using equity interest in net asset which is added appropriate adjustments based on recent available information, and these financial assets are classified as Level 3.

Investment trust and other securities

Financial instruments which do not have observable market data, the Company evaluates fair value by using equity interest in net asset which is added appropriate adjustments based on recent available information, and these financial assets are classified as Level 3.

(Unit: JPY millions)

	Level 1	Level 2	Level 3	Total
Equity-based financial assets measured at FVTOCI				
Equity securities	10,406	-	1,700	12,106
Financial assets measured at FVTPL				
Investment trust and other securities	-	-	10,476	10,476
Other financial assets	-	215	-	215

Financial instruments classified as Level 3 are mainly composed of non-marketable securities and investment trusts. The valuations of these financial instruments are measured using a valuation method with appropriate adjustment to our equity in net assets. The results of the valuations are reviewed and authorized by the appropriate authorized person.

For financial instruments classified as Level 3, significant changes in fair value are not expected if the Company changes the unobservable input to an alternative assumption that can reasonably be considered.

The existence or non-existence of the important transfers between the levels of fair value hierarchy are recognized, assuming that the transfers occurred at the end of each reporting period.

3) Financial instruments not measured at fair value

Primary methods of measuring financial instruments not measured at fair value are as follows:

Debt securities

Fair values of debt securities are calculated by present value discounted by the expected rates if the Company made investments or borrowings on equal terms for the remaining period.

(Unit: JPY millions)

	Level 1	Level 2	Level 3	Total
Assets				
Other investments				
Financial assets measured at amortized cost				
Debt securities	-	1,732	-	1,732

4) Changes in financial assets classified as Level 3

Changes in financial assets classified as Level 3 during the years ended March 31, 2026 are as follows

(Unit: JPY millions)

Equity securities	For the year ended March 31, 2026
Balance at the beginning of the year	1,899
Other comprehensive income (Note1)	(279)
Purchase	218
Sale	(138)
Balance at the end of the year	1,700

(Unit: JPY millions)

Investment trust and other securities	For the year ended March 31, 2026
Balance at the beginning of the year	8,509
Profit or loss (Note2)	1,305
Purchase	803
Sale	(141)
Balance at the end of the year	10,476

(Notes)

1. Gain or loss included in other comprehensive income is related to investments held at the end date of the year such as non-marketable equity securities. This gain or loss is included in "Changes in fair value of financial assets measured at FVTOCI."
2. Gain or loss included in profit or loss are related to financial assets that are measured at FVTPL as of the end date of the year. This gain or loss is included in finance income or finance expenses. Gain or loss included in profit or loss are due to changes in unrealized gain or loss on financial assets held at end of each reporting period.

6. Notes to Revenue Recognition

(1) Breakdown of the revenues

The breakdown of the revenues recognized in the contracts with customers are as follows. The revenue provided to the customers based on the lease contract is included below due to the immateriality.

(Unit: JPY millions)

Network services	178,738
Internet connectivity services (enterprise)	53,891
WAN services	28,554
Outsourcing services	67,622
Internet connectivity services (consumer)	28,671
Systems integration	163,639
Systems construction	67,871
Systems operation and maintenance	95,768
ATM operation business	3,018
Total	345,395

(2) The basic information to understand the revenues

Network service revenue, for which the Company's performance obligations are satisfied over the contractual period, are recognized monthly as profit on a straight-line basis over the period during which the performance obligations are satisfied. Payments are generally made by the end of following month of receiving our services and there is no significant financing components. Initial setup fees received in connection with network services are deferred and the Company performs an assessment to determine whether it in turn, provides a material right for the customer to continue services after the initial contract period. If a contract gives material rights to customers, initial setup fee revenues for the contract are recognized over the estimated average period of the subscription for each service. On the other hand, if the contract does not give a material right, revenue are recognized over the minimum usage period of the subscription for each service.

Systems integration revenue involves one or more of the following deliverables:

- Systems construction services—such services include all or some of the following elements depending on the arrangements to meet each of our customers' requirements: consulting, project planning, system design and the development of network systems. These services also include software installation, as well as hardware configuration and installation.
- Software—we resell third-party software such as Oracle and Windows to our customers, which are installed by us during the system development process.
- Hardware—we also resell third-party hardware, primarily servers, switches and routers, which we install during the system development process. Hardware sold is generic hardware that is often sold by third-party manufacturers and resellers.
- Monitoring and operating services—we monitor our customers' network activity and internet connectivity to detect and report problems. We also provide live data backup services.
- Hardware and software maintenance services—we repair or replace malfunctioned hardware parts. We also troubleshoot software and provide suitable solutions to customers.

System construction services are generally delivered over a period from three to nine months. All hardware and software are delivered and installed during this period. Customers are required to pay a fixed fee that is not payable until after the system construction has been completed and accepted by our customers. Payments are generally made by the end of following month of the customer acceptance and there is no significant financing components.

Monitoring, operating, and hardware and software maintenance services generally commence once our customers have accepted the systems, and contract periods are generally from one to five years. Our contracts include a stated annual fee for these services. Payments are generally made by the end of following month of receiving our services and there is no significant financing components.

For arrangements with multiple performance obligations, including system construction services, hardware, software and undelivered services (e.g., monitoring, operating and hardware and software maintenances services), the Company allocates revenue to all performance obligations based on standalone selling prices. Revenue allocations are performed based on certain key judgements. Standalone selling prices are estimated based on all the reasonably available information including market status, the Company's own factors, and other observable inputs, and using a range of prices properly defined for the purpose of allocation.

Accounting methods for each performance obligation identified and the period for recognition of each performance obligation are as follows:

- Revenue allocated to the performance obligations of system construction services and hardware and software are recognized over the periods during which the performance obligations are fulfilled. The progress is measured by the input method based on the incurred cost (cost to cost method) because we understand that cost is incurred as progress of system construction.
- Revenue related to monitoring, operating and hardware and software maintenance services is recognized on a straight-line basis over the contract period because the Company's performance obligations for these services are satisfied over the contractual periods. The same applies for network services revenue.

The Company evaluates whether it is appropriate to record the gross amount of revenues and related costs or the net amount earned in reporting system construction services and equipment sales, depending on whether the Company functions as the principal or agent.

ATM operation business revenues consist primarily of commissions for ATM withdrawal transactions. The ATM commissions collected at each withdrawal are recognized as ATM operation revenues because customers receive benefits at the time of use.

(3) Information to understand the revenue of the reporting period and the subsequent periods.

i) Contract assets and contract liabilities

Contract assets represent the rights at the end of the reporting period to receive considerations, excluding receivables, in exchange for the fulfillment of performance obligations, mainly in system construction services including software installation and/or hardware configuration and installation. Contract assets are reclassified to receivables when all conditions other than the passage of time are resolved upon completion of the system construction service.

Contract liabilities represent the excess of the consideration received by the customers over the amount for which revenue is already recognized, mainly in monitoring and operating services and/or hardware and software maintenance services. Revenues from contract liabilities are recognized as we transfer those services to a customer and satisfy those performance obligations.

Among the revenue recorded for the year ended March 31, 2026, JPY 14,552 million were recognized from the balance of contract liabilities as of March 31, 2025.

ii) Transaction price allocated to remaining performance obligations

Transaction prices allocated to remaining performance obligations as of March 31, 2026 is JPY 84,422 million, which are related to the following services:

- System construction services
- Monitoring, operating and maintenance of hardware and software
- Network services with contracts that give material rights that affect customers' decisions regarding continuing services.

The Company estimates that JPY 56,789 million of revenue related to remaining performance obligations will be recognized within one year and JPY 27,633 million after one year but within six years. Contractual periods of services other than those described above are generally less than one year, and information on remaining performance obligations related to these services is not presented due to immateriality.

7. Notes to per Share Information

(1) Total equity attributable to owners of IJ:	JPY 891.38
(2) Basic net income attributable to IJ per share:	JPY 136.51

8. Subsequent Events

There is nothing to report on this subject.

Non-Consolidated Statement of changes in Net Assets

(From April 1, 2025 through March 31, 2026)

• Notes to Non-Consolidated Financial Statements

1. Notes to Significant Matters Regarding Accounting Policies of Non-Consolidated Financial Statements

1-1. Basis for valuation and recording of assets

(1) Valuation and methods for securities

Shares of subsidiaries and affiliates: Stated at cost based on the moving-average method.

Other securities:

Marketable Securities:

Market value method based on the market price as of the end of the fiscal year (all of the changes in the fair value are directly reported in valuation and translation adjustment in shareholders' equity, while the cost of the securities at the time of their sale is calculated using the moving-average method).

Non-Marketable Securities:

Stated at cost based on the moving-average method.

Investments in limited liability investment partnerships and similar partnerships are accounted for by including IJ's net equity in these investments based on the most recent statement of accounts available according to the report on financial accounts stipulated in the investment partnership agreements.

(2) Valuation and methods for inventories

Inventories are stated at cost (the balance is adjusted to reflect declines in profitability).

Merchandise and supplies: moving-average method

Work in process: specific identification method

1-2. Depreciation methods for assets

(1) Property, Plant and Equipment (excluding assets under capital lease)

Straight-line method

Depreciable assets whose acquisition values are JPY100 thousand or more but less than JPY200 thousand are depreciated in equal installments over three years.

The useful lives of major depreciable assets are as specified below:

Buildings:	20 to 50 years
Plant and buildings facilities annexed:	4 to 20 years
Construction other than buildings:	4 to 45 years
Tools, machines, instruments and equipment:	2 to 20 years

(2) Intangible fixed assets (excluding assets under capital lease)

Straight-line method

Internal-use software is amortized over the estimated useful lives (5 to 7 years).

Goodwill is amortized over 20 years and customer relationships are amortized over 12 to 19 years, which reflects the pattern of economic benefit over their estimated useful lives. Trademark rights and patent rights are amortized over 8 to 10 years based on the estimated useful lives.

(3) Assets under capital lease

Capital leases other than those deemed to transfer ownership of properties to lessees are amortized over the term of leases on a straight-line basis and the residual values equal zero.

1-3. Basis for recording allowances

(1) Allowance for doubtful accounts

To prepare for possible losses resulting from non-payments of account receivables for trade and loans and others, an allowance is provided from past history in the case of general receivables. In the case of credits for which the relevant debtors are likely to default and other certain credits, such allowance is based on the anticipated uncollectible amount after assessment of likelihood of non-payment of individual customers.

(2) Accrued directors' and company auditors' retirement benefits

To prepare for payment of retirement benefits to Standing Directors and Company Auditors, IIJ calculates the required amount based on regulation of Directors' and Company Auditors' retirement benefits.

On May 26, 2011, IIJ's Board of Directors resolved to abolish the retirement allowance plan for Standing Directors. In connection with this decision, IIJ proposed to grant a retirement allowance to incumbent Directors in line with the abolished Directors' retirement allowance plan, in order to reward the aforementioned persons for their services during their respective terms of office up to the closing of the Ordinary General Meeting of Shareholders on June 28, 2011 and it was resolved accordingly at the Ordinary General Meeting of Shareholders on June 28, 2011. The payment of each of the retirement allowances will be made for a reasonable amount in accordance with IIJ's established rules at the time of retirement of each Director. Accordingly, the allowance for retirement payment was included in "Accrued directors' and company auditors' retirement benefits".

(3) Provision for loss on contracts

To prepare for potential losses arising from the performance of contracts, IIJ recognizes provisions based on a reasonable estimate.

(4) Provision for share based compensation expenses

In preparation for the delivery of company shares to directors and executive officers in accordance with the Share Delivery Rules, we have recorded an estimated liability for share delivery as of the end of the current fiscal year.

1-4. Accounting treatment for retirement benefits

IIJ adopts a defined contribution pension plan.

Expenses related to retirement benefits under the defined contribution pension plan are recognized as expenses when the contributions are paid.

(Additional information)

In connection with the revision to IIJ's retirement benefit regulations, IIJ transitioned from an unfunded severance benefit and a defined benefit pension plan to a defined contribution pension plan in September 2025. In doing so, IIJ applied "Accounting for Transfers between Retirement Benefit Plans" (ASBJ Guidance No. 1).

As a result of this transition, an impact of JPY 2,356 million was recognized as extraordinary income.

1-5. Basis for recording sales and costs

IIJ recognizes revenue based on the following five-step model.

Step 1: Identify the contract with a customer

Step 2: Identify all the individual performance obligations within the contract

Step 3: Determine the transaction price

Step 4: Allocate the price to the performance obligations

Step 5: Recognize revenue as the performance obligations are fulfilled

IIJ has determined that our performance obligations related to network service are normally satisfied over time because network services make various networks accessible during the contract period. Therefore, revenues from network service are recognized monthly on a straight-line basis over the contract period.

System integration revenues consist of the system construction service and the system operating and maintenance service.

Our performance obligations related to system construction service are satisfied over time, because our performance does not create an asset with an alternative use to us and we have an enforceable right to payment for performance completed to date. Therefore, revenues from system construction service are recognized based on the progress of the fulfillment of the performance obligations measured at the end of the reporting period. The progress is measured by the input method based on the incurred cost (cost to cost method) to reflect the progress of the construction properly because we understand that cost is incurred as progress of system construction.

Revenues from system operating and maintenance service are recognized on a straight-line basis over the period when the performance obligations are fulfilled because our performance obligations maintain various systems available to use during the contract period.

1-6. Other significant accounting policies

(1) Presentation of the amount

The figures are rounded to the nearest million yen.

2. Notes to Accounting estimates and judgements

(Measurement of the progress towards complete satisfaction of the performance obligation of the system construction service)

We have determined the performance obligations of the system construction service are satisfied over time and the appropriate method of measuring progress towards complete satisfaction is input method, i.e. costs incurred relative to the total expected costs to the satisfaction of those performance obligations (cost to cost method). For applying the cost to cost method, the calculation of the total expected cost to the satisfaction of the performance obligations requires us to make various judgement and assumptions. There is the possibility that these assumptions may be affected by changes in uncertain future conditions regarding to the system construction service, such as the increasing production costs incurred to additional requirements from the customer, which may have a material impact on the financial statements in future periods.

For the year ended March 31, 2026, the amount of revenue from system construction service recognized by the cost to cost method was JPY 32,014 million.

(Subsequent measurement of investment in affiliated companies)

For subsequent measurement of non-Marketable Securities, we recognize the impairment losses on the securities if their substantial value declines to less than 50 percent of its acquisition value, unless the entity has reasonable expectations of recovering its value within 5 years. We measured the substantial value of investment in DeCurret Holdings, Inc. considering its excess earning power. The measurement of the substantial value requires us to make various judgements and assumptions such as the future cash flows and the discount rate. These judgements and assumptions include the following, but not limited to:

- the timing of monetization of the digital currency business
- the increase in the number of customers and future sales of the digital currency business
- the assessment of uncertainty of the digital currency business and how to reflect it in the future cash flows and discount rate

As a result of the measurement of the substantial value of investment in DeCurret Holdings, Inc., we recognized a valuation loss on investments in affiliated companies of JPY 2,286 million yen because its substantial value declined to less than 50 percent of its acquisition value.

3. Notes to Non-Consolidated Balance Sheet

Monetary claims and liabilities to affiliated companies (excluding monetary claims or liabilities presented separately)

Short-term monetary claims:	JPY	737 million
Short-term monetary liabilities:	JPY	5,225 million

4. Notes to Non-Consolidated Statement of Income

Transactions with affiliated companies (other than accounts separately presented in financial statements)

Revenues:	JPY	7,761 million
Purchases:	JPY	40,178 million
Turnover from non-operating transactions:	JPY	160 million

5. Notes to Non-Consolidated Statement of Shareholders' Equity

Number of treasury stock as of March 31, 2025

Common stock:	6,186,958 shares
---------------	------------------

6. Asset Retirement Obligations

(1) IJ recorded asset retirement obligations for restoration expenses of office premises and land for company offices or data centers in order to comply with the lease agreements.

(2) Calculation method for asset retirement obligations

The asset retirement obligations were calculated using the estimated use period for leasehold of 20 years based on the contract period, headquarter office space of 15 years and branch offices of 20 years based on the current office plan and with the discount rate estimated to be from 0.2% to 3.0%, calculated based on the distribution yield of Japanese government bonds for the corresponding period.

(3) Net increase / decrease of asset retirement obligations as of March 31, 2026

Balance at beginning of the fiscal year:	JPY	957 million
Increases for purchases of tangible assets:	JPY	105 million
Other increases:	JPY	20 million
Balance at end of the fiscal year:	JPY	1,082 million

7. Deferred Tax Accounting
