

Press Release

Three IIJ Services Listed on the Digital Agency's Digital Marketplace

--Supporting Smooth Cloud Service Procurement by Government Organizations and Local Governments--

TOKYO – September 28, 2026 – Internet Initiative Japan Inc. (IIJ, TSE Prime: 3774), one of Japan's leading Internet access and comprehensive network solutions providers, today announced that three of its services are now listed on the Digital Marketplace (DMP*), operated by Japan's Digital Agency. The three services are IIJ ID Service, IIJ Identity Governance Management Service, and IIJ Cloud Data Platform Service.

The DMP helps government agencies find cloud-based software (SaaS) for procurement. With these three services now available on the platform, government agencies and local governments have access to the services' security information, features, and pricing on the DMP, and can procure them smoothly. IIJ's services support three key needs: advanced identity and access management for both employees and contractors, smooth data integration between systems, and secure authentication infrastructure for cloud services and business systems.

* For more information about the DMP, visit the following web site: <https://www.dmp-official.digital.go.jp/> [Japanese site]

IIJ Services Listed on the DMP

- IIJ ID Service
An identity management and authentication service that integrates authentication for multiple cloud services and business systems, enabling single sign-on and multi-factor authentication and other capabilities.
➤ <https://www.ij.ad.jp/en/biz/iid/>
- IIJ Identity Governance and Administration Service
A service that centrally manages accounts and access privileges associated with employee hiring, transfers and departures, as well as organizational changes, thereby making identity management operations more efficient.
